

I support media diversity

Please do not relax the rules on broadcast ownership for the media. There has to be more time and more disclosure and more public process so that the citizens of the United States know what is going on with our media. There has to be more information put out about it. We now have big companies monopolizing the tv, radio and newspapers, being bought by certain right wing large companies, who control what we hear and see in the media. It is biased and given to us just the way these companies want to and only give us what they want to let us know. I have had access to foreign media during this war and we, as Americans have not been told the truth on our own stations and newspapers. We have to get the truth from other foreign countries. This is not freedom of the press, etc and we are entitled to a free press, and network communications in an unbiased way. The Conservative religious right wing is taking over this country and we are losing our democracy from this and the peoples right to know the truth. This is Un-American and very scary. I do not only accuse the right wing media for this. This should not go on by any group controlling the news, whether they are right, left or any group. We are entitled to the true facts given to us so that we may decide for ourselves or do we have to look for the foreign media for the truth. This is very bad in a so called democracy. We are losing our democracy and this is a big part of it. Thank you.
